Hospice House

Sanctuary
A place to meet with God

Amenities

Located on 17 acres of unique country charm, it is a natural and serene setting for patients and families to enjoy. Hospice House features six private suites along with 12 private bedrooms that are arranged in groups of three around shared kitchenette, dining, sitting and TV viewing area. There is plenty of space for a loved one to sleep overnight on a pull-out couch. There are also larger gathering and dining areas, an extensive resource library, a children's play area, a patient spa and beauty nook, onsite visitors' café and onsite kitchen with chef. The Hospice House features ponds, sunny patios, and walking paths for patients and families to explore.

Hospice Care

Hospice House is a beautiful, residential facility where patients and families receive specialized physical, emotional, and spiritual end-of-life care. Hospice House residents receive compassionate care and attention 24-hours a day, seven days a week.

Financial Considerations

There is a daily room and board charge comparable to that of other area residential accommodations. Financial assistance is available to families unable to pay the full charge. The services of hospice trained registered nurses, certified aides, trained counselors, spiritual advisors and volunteers are covered by Medicare, or private insurance.

“Love begins
at home, _____
and it is not how much we do...

but how much love
we put into that action.”

—Mother Teresa

Eligibility

Hospice of Holland provides end-of-life care for people of *all ages*. Patients become eligible for hospice care when they choose care focused on comfort rather than cure, and when the physician estimates the person's life expectancy to be months rather than years. Through *physical, emotional and spiritual* care, we help patients feel comfortable, enhance their quality of life, and provide support when it's needed most.

Other Care Options

Palliative Care (pain and symptom relief)

Care that gives comfort, eases pain or lessens the severity of symptoms without curing the underlying disease is called “palliative care.” Hospice of Holland offers a palliative care program for patients who are suffering from an illness that is serious but not necessarily terminal, or for those not yet ready for hospice care. Upon request from the patient's physician, our medical director provides a consultation that includes evaluation and treatment of difficult-to-control symptoms or discomfort due to an illness or ongoing treatments.

Respite Care

Respite care allows caregivers providing end-of-life care an opportunity to get some much-needed rest or to manage other life-issues. Hospice of Holland offers respite care for up to five days at a time, 24-hours a day at the Hospice House or in a hospital using the respite hospice benefit.

General Inpatient (GIP) Benefit

General inpatient care is offered at our Hospice House or in an area hospital. It is a temporary level of care determined by the physician and it provides 24-hour care from skilled registered nurses focusing on managing a patient's symptoms that can not be controlled at home. Once symptoms are controlled, the patient may choose to return home, to a facility or to reside at the Hospice House under “routine care”, which means the patient is responsible for room and board expenses.
